

PROFILE

A current 3rd year undergraduate student at King's College London, aiming to become a Robotics Software Developer. One of the Developer Leads for the LASR RoboCup@Home team.

EDUCATION**King's College London**

London, England

BSc in Artificial Intelligence

2024-2027

Classification: Grade achieved to date – 1st

Relevant Coursework:

- Game development in Java:
 - Produced a JavaFX game in a group of 4 that had real time collision detection and random map generation and played like the Super Mario games.
 - Attained a 90 in the coursework.
- A.I. plant classifier in Python:
 - Produced an A.I. application that identifies plant diseases based on input images of plant leaves.
 - Developed in a group of 5 people, using the Agile development life cycle, with the use of a Kanban (Jira) board for tracking tasks and up to 2 meetings per week to keep track of progress and project scope.
 - Tech stack used was ClearML, GitHub, Python (Pytorch for model and Gradio for U.I.), and hugging face for deployment. Final model had an accuracy of 98%, with a grade of 87 in the coursework.
- Human-Robot Interaction software for KCL events:
 - Produced ROS2 software for an open day that can communicate and give information to prospective students, as well as respond to people waving by waving back.
 - Worked in a team of 10 people, utilising Kanban board to keep track of progress, regular weekly meetings to get updates on any progress/hurdles in development.
 - Tech stack utilised was mainly Python and ROS2, integrating to be used with the TIAGo robot. Achieved a grade of 88 in the coursework.

St Ignatius College

London, England

A-Levels (Mathematics, Further Mathematics, Physics, Computer Science)

2022-2024

Grades: Awarded A*A*AA for these subjects respectively.

GCSEs (Including Mathematics, English Language, Computer Science)

2017-2022

Grades: Awarded 999998887 with 9s in the above subjects.

EXPERIENCE**Graduate Teaching Assistant**

King's College London, October 2026 - Ongoing

- Currently working as a Teaching Assistant for the Java Programming and the Mathematics and Statistics modules.
- I deliver content live in tutorials and lab sessions, explaining misunderstood and complicated concepts.

PhD Research Assistant

King's College London

Robotics Software Developer

August 2026 - Ongoing

- Developed robotic software to help with the trials of a PhD Psychology student, to better understand people's trust in robotics.
- The Robot communicates with a psychopy program to either assist a participant with a game the participant is playing. The robot can either give the correct answer or give the incorrect answer, measuring whether the participant will pay attention to the robot's advice.

KCL Industry/Open Day Events

King's College London

Robotics Software Developer

August 2026 - Ongoing

- Working in a team of 2 people to help deliver Human-Robot Interaction software for the TIAGo robot.
- Developed on top of the code produced for the HRI software mentioned in the relevant courseworks. Looking into adding a demo of TIAGo's arm grasping/manipulation.

LASR Team (Learning Autonomous Service Robots)
Robotics Software Developer & Developer Lead

King's College London
October 2024 - Ongoing

- Helping to manage a team of 10 people to tackle the 4-5 tasks given in the RoboCup@Home league. Organising workdays, deadlines, and mentoring new members on our codebase.
- Also, a core developer of the codebase, helping to now add in arm manipulation for grasping and folding tasks.
- Attended RoboCup 2026 in Incheon, South Korea – helping the team to optimise our workflow to get the best possible results.

KURF (King's Undergraduate Research Fellowship)
Robotics Software Developer

King's College London
June 2026 – July 2026

- Worked as part of the LASR team to perform fully funded research for development of the code for tasks for the 2026 RoboCup@Home competition.
- Specifically focused on the Human-Robot Interaction task, adding to the LASR team's existing codebase; presented the LASR team's research with another peer at the competition.

SKILLS AND INTERESTS

Technical:

Proficient:

- Python, Java, Git, ROS2 (rclpy), Linux Ubuntu terminal commands

Currently learning:

- C++, ROS2 (rclcpp)

Languages: English (native)

Interests: Playing video games and chess
